

# ROPE ACCESS ANCHOR POINT TIN ROOFS

## FEATURES

- ↳ Suitable for roofs supported by wooden trusses or steel purlins.
- ↳ Features a 16mm eyelet.
- ↳ Rated to 15kN for rope access or falls arrest in accordance with AS/NZS 1891.4 & AS/NZS 4488.
- ↳ Anchor plates are individually serial numbered for easy compliance.
- ↳ Includes install instructions and engineers certificate.
- ↳ Oversized plate distributes the load over a large surface area, eliminating the potential for damage to the roof during sustained loads.
- ↳ Rubber pad beneath the plate provides a buffer between the roof and the anchor point prevent reactions between metals and making it 100% water tight.

The SKYPRO top mount rope access anchor point is the perfect non-invasive abseil anchor solution for most tin roof profiles including: Corrugated, Kliplok, Spandek and Trimdek.

Fabricated from marine grade stainless steel and rigorously tested to the AS/NZS 5532 standard, the anchor point exceeds the requirements for rope access and comes with a 10 year manufacturer's warranty.
